P9

**RUST REMOVER
LIMESCALE REMOVER**

Introduction

"Unleash the Power of Lime—Pulfresh P9 for Stubborn Stains, Rust & Mineral Deposit"

Pulfresh P9 offers a powerful cleaning solution for the toughest cleaning challenges. Whether it's rust from metal surfaces or unsightly mineral deposits, the natural acidic properties of lime make it the ultimate choice. Lime's natural acidity is tough on stains but gentle on surfaces, offering an eco-friendly cleaning alternative. Safe for use on a wide variety of floor types, including tiles, marble, wood, and laminate.

"Unleash the Power of Lime—Pulfresh P9 for Stubborn Stains, Rust & Mineral Deposit"

1

P9 for Rust Removal

The high concentration of citric acid in lime makes it incredibly effective in breaking down rust (iron oxide). This powerful acid gently dissolves rust stains without damaging the underlying surface, making Pulfresh P9 perfect for:

- Bathrooms: Rust stains from metal faucets or pipes.
- Garage Floors: Rust left by tools, machinery, or water leaks.
- Outdoor Spaces: Patio tiles affected by rust from metal furniture or grills.

2

P9 for Mineral Deposit Removal

Mineral deposits, such as limescale and calcium buildup, can be difficult to remove, especially on tiled surfaces or around water fixtures. Pulfresh P9's lime-based formula works to dissolve these deposits, restoring the surface's shine and cleanliness.

- Bathroom Floors and Walls: Removes calcium deposits from water splashes and humid conditions.
- Kitchen Sinks and Tiles: Tackles limescale buildup from hard water.
- Outdoor Areas: Cleans mineral deposits from outdoor tiles exposed to rainwater.

FEATURES OF PULFRESH P9

LIME-POWERED FORMULA

Lime's citric acid breaks down rust, hard stains, and mineral deposits effortlessly. Uses the natural acidic properties of lime for effective cleaning and stain removal.

DEEP CLEANING FOR TOUGH SURFACES

Designed to penetrate and lift stubborn stains, even on heavily trafficked areas. Works on a wide variety of floor surfaces, including tiles, marble, granite, hardwood, and more.

TRIPLE ACTION CLEANING

- **Rust Removal:** Dissolves rust stains on floors from metal objects and surfaces.
- **Hard Stain Removal:** Tackles tough stains like oil, grease, grime, and dirt buildup.
- **Mineral Deposit Removal:** Efficiently removes limescale and calcium deposits from water splashes and hard water buildup.

P9 Limescale Remover

P9 is a versatile cleaning product designed to tackle the buildup of mineral deposits (usually calcium carbonate) that result from hard water. Here are the primary uses of limescale removers:

Bathroom Fixtures

- ☐ Showerheads
- ☐ Taps & Faucets
- ☐ Tiles & Grout
- ☐ Clean sink and faucets
- ☐ Toilets
- ☐ Glass Shower Doors

Kitchen Surfaces

- ☐ Sinks
- ☐ Draining Boards

Household Appliances

- ☐ Kettles & Coffee Makers
- ☐ Dishwashers & Washing Machines

Home Maintenance

- ☐ Water Heaters and Boilers
- ☐ Humidifiers

Pool Maintenance

- ☐ Swimming Pools & Hot Tubs

Commercial & Industrial Use

- ☐ Cooling Towers & Heat Exchangers
- ☐ Pipes & Plumbing Systems
- ☐ Catering Equipment

P9 have widespread applications in both residential and industrial settings. They help maintain cleanliness, restore the functionality of appliances, and extend the life of various surfaces and systems affected by hard water. Regular use of these products can prevent limescale buildup, saving time, effort, and costs associated with repairs and inefficiency.

P9 Rust Remover

P9 specially formulated to dissolve or convert rust (iron oxide) back into a stable form, making them highly useful in various applications. Here are some common uses of rust removers:

Metal Restoration

- ☐ Tools and Hardware
- ☐ Automotive Parts
- ☐ Bicycles
- ☐ Outdoor Furniture

Home Exterior Maintenance

- ☐ Gates and Railings
- ☐ BBQ Grills and Outdoor Equipmen

Household Maintenance

- ☐ Appliances
- ☐ Faucets and Fixtures

Plumbing and Heating Systems

- ☐ Radiators and Boilers
- ☐ Water Heaters

Marine Applications

- ☐ Boats and Marine Equipment:

Industrial and Commercial Uses

- ☐ Machinery Maintenance
- ☐ Pipes & Plumbing Systems
- ☐ Construction Tools

P9 have widespread applications in both residential and industrial settings. P9 is invaluable for maintaining, restoring, and preserving a wide variety of metal items in both residential and industrial settings. Regular use helps prevent further corrosion, extends the life of metal objects, and enhances their appearance.

FAQs

WHAT MAKES PULFRESH P9 EFFECTIVE FOR RUST, HARD STAINS, AND MINERAL DEPOSITS?

Pulfresh P9 is powered by natural lime, which contains citric acid. This acid effectively breaks down rust, grease, hard stains, and mineral deposits, making it ideal for tough cleaning tasks on floors.

IS PULFRESH P9 SAFE TO USE ON ALL TYPES OF FLOORS?

Yes, Pulfresh P9 is designed for use on a variety of floor types, including tiles, marble, granite, hardwood, and laminate. Its non-toxic formula ensures that it cleans without damaging surfaces.

CAN I USE PULFRESH P9 FOR BOTH INDOOR AND OUTDOOR CLEANING?

Absolutely! Pulfresh P9 is versatile and works well on indoor surfaces like kitchen and bathroom floors, as well as outdoor areas like patios and garages.

CAN I DILUTE PULFRESH P9 FOR REGULAR CLEANING?

Yes, for general cleaning purposes, you can dilute Pulfresh P9 with water. For tougher stains or rust removal, apply it directly for more concentrated cleaning power.

WILL PULFRESH P9 LEAVE ANY RESIDUE OR FILM ON MY FLOORS?

No, Pulfresh P9 is designed to leave floors clean without any sticky residue or streaks. Simply rinse the area with clean water after scrubbing for a polished finish.

HOW LONG SHOULD I LEAVE PULFRESH P9 ON TOUGH STAINS?

For hard stains or mineral deposits, let Pulfresh P9 sit for about 15-20 minutes before scrubbing or rinsing. For the best results, use a soft brush on the affected area.

DOES PULFRESH P9 WORK ON REMOVING LIMESCALE OR MINERAL DEPOSITS?

Yes, Pulfresh P9 is excellent for dissolving mineral deposits like limescale, especially in bathrooms or areas exposed to hard water. Its lime-based formula helps break down these deposits with ease.

HOW DO I USE PULFRESH P9 FOR RUST REMOVAL?

Apply Pulfresh P9 directly to the rusted area, let it sit for 15-20 minutes, then scrub lightly and rinse off. For heavily rusted areas, you may need to repeat the process for best results.

DOES PULFRESH P9 DISINFECT AS WELL AS CLEAN?

Yes, while Pulfresh P9 is designed for powerful cleaning, it does contain antibacterial or disinfecting agents.

HOW MUCH PULFRESH P9 SHOULD I USE FOR REGULAR CLEANING?

For regular cleaning, dilute about 100 ml (roughly 3 cup) of Pulfresh P9 in a bucket of water (around 4-5 liters). For tougher stains or rust, apply it directly without dilution for better results.
